

DETAILED ACTION

Allowable Subject Matter

1. Claims 1, 2, 4-7, 9, 10, 13-15, 19-21 are allowed over the prior art of record as presented in the After Final amendment filed October 9, 2008.
2. The following is an examiner's statement of reasons for allowance: The claims in this application have been allowed because the prior art of record fails to disclose either singly or in combination the claimed device of a liquid injection system comprising one or more syringes, having an injector and a cylinder adapter wherein the adapter has a contact-transfer member in contact with a mount-detecting means on the injector when the adapter body with the cylinder member is installed in the cylinder holding mechanism.
3. The closest prior art of record is USPGPub 2001/0021823 A1 to Nemoto and USPN 5,714,232 to Reilly et al, however these references do not disclose the device as claimed or described above.
4. Regarding claims 1, 13, and 19, the closest prior art of record fails to teach among all the limitations or render obvious the cylinder adapter having a contact-transfer member which contacts the mount-detecting means when the syringe is installed in the adapter and the adapter is installed in the injector.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
